

Hypodermic Syringe Access and Disposal Programs (Re-issue DB 15-006)

The San Francisco Department of Public Health (SFDPH) continues to fund Syringe Access and Disposal Programs. There are several programs that operate services throughout the city. Refer to the back of this bulletin for a list of programs locations and schedules.

Members should be aware that the syringe program is a place where injection drug users bring their used syringes and access sterile equipment. Many injection drug users cannot visit a site themselves and instead have a friend or partner access services for them. This individual may be carrying many syringes, to or from a site because they are accessing services for multiple persons.

Members should use discretion when they encounter possible syringe program participants and are advised that the intent of the Department is not to interfere with the program.

Members shall not confiscate syringes, alcohol wipes, naloxone, biohazard waste containers, or other sterile injection equipment, at or near access and disposal sites.

When in doubt, members should ask a supervisor to respond to the scene to ensure the policy is followed.

In 1993, San Francisco began funding syringe access after a local state of emergency was declared because of the HIV epidemic. SFDPH funds organizations to provide access to syringes, alcohol wipes, biohazard waste containers, as well as other sterile injection equipment to reduce the transmission of bloodborne viruses such as HIV and Hepatitis C. In addition because overdose is the leading cause of death among injection drug users, SFDPH supports overdose prevention by providing take-home prescriptions of naloxone.

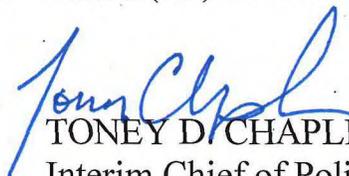

On January 1, 2006, Governor Schwarzenegger signed Assembly Bill (AB) 136. The bill amends previous legislation to allow counties and cities to authorize syringe programs in their jurisdictions without the necessity to declare a state of local emergency.

Beginning January 2015, licensed pharmacists have the discretion to **sell hypodermic needles and syringes** to adults age 18 and older without a prescription to reduce the spread of HIV, hepatitis C and other blood-borne diseases. **There is no longer any limit** on the number of needles and syringes that an adult may purchase and possess. These changes to California law were made by Assembly Bill 1743 (Ting, Chapter 331, Statutes of 2014).

California code specifies that pharmacists, physicians and syringe exchange programs are all authorized sources for nonprescription syringes for disease prevention purposes.

Each syringe program site coordinator has a copy of this Bulletin readily available to present to any police officer.

Please direct questions about the programs to Eileen Loughran, Community Liaison, Community Health Equity & Promotion Branch, San Francisco Department of Public Health at (415) 437-6218. Each program supported by the SFDPH will have a copy of this bulletin.

TONEY D. CHAPLIN
Interim Chief of Police

Per DB 15-141, sworn members are required to electronically acknowledge this Department Bulletin in HRMS.
